Applicability: Generic – Administrator Tools

Internal Data Fixes: N/A

Internal Release:

Bug Fix: B2022-244

Check RO Links tool, added logic to process selected procedures instead of an entire procedure set

Generic External Release:

Administrator Tools

For the Check RO Links tools, PROMS will now allow for checking individually selected procedures as well as an entire procedure set

Plant Specific Information for Release Letter:

N/A

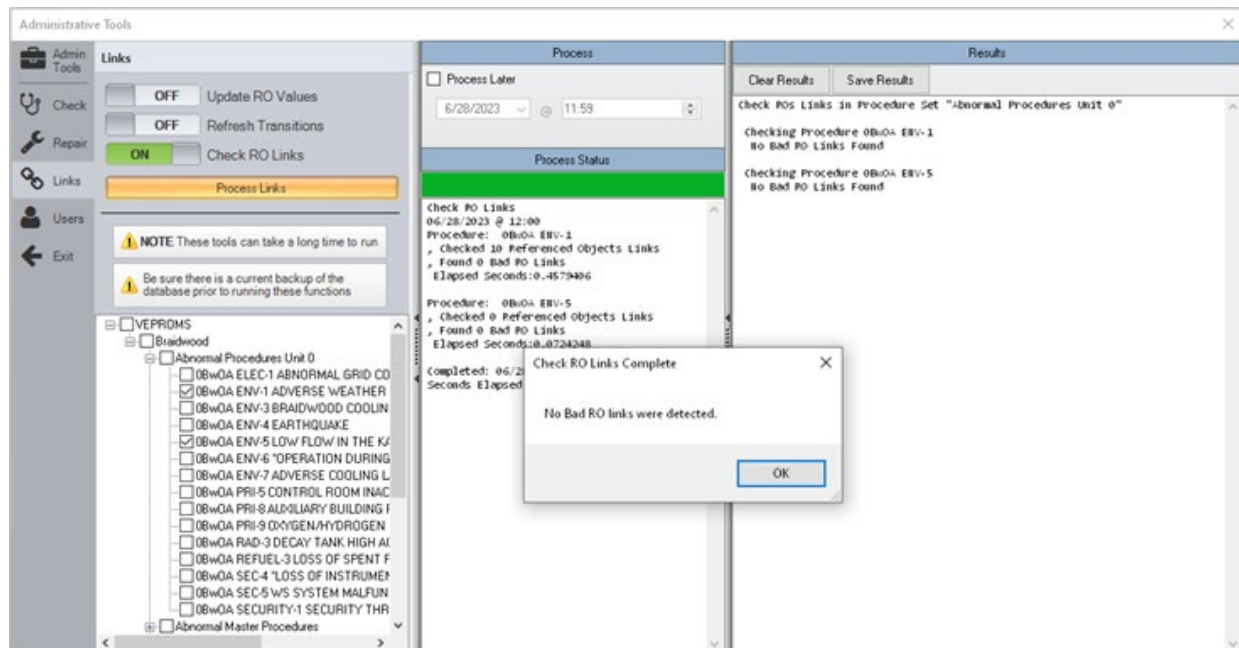

Testing Performed:

See Testing Requirements.

Testing Requirements:

Use Any plant data

- Open PROMS and open the Administrator Tools dialog
- Select the Links tab
- Select the Check RO Links tool (switch)
- Expand a procedure set and select one or two procedures
- Run the tool.
- Verify only the selected procedures are checked.

Changes/Additions to User Documentation:

Update the Admin Tools chapter as needed to reflect the additional functionality
